Institute of Business and Design

Design Faculty, diploma — 2024

Diploma project — brand identity for a tea house chain. Course projects: Juzzle, Qummy, yoyote, MOJO Cacao, Orange Toys.

PERSONAL QUALITIES

- Hardworking
- Diligent
- Detail-oriented
- Reliable
- Proactive
- Fast learner

LANGUAGES

Russian — native
English — technical proficiency

ABOUT

Graphic and brand designer with 3+ years of commercial experience and 100+ delivered projects. I specialize in visual solutions for brands, digital products, corporate websites, landing pages, and marketing communications. I run projects end to end — from research and concept to final production or development-ready files. AI tools are part of my regular workflow: from references and rough concepts to 3D visuals, video, and copy — this speeds up the path from idea to result without a drop in quality.

EXPERIENCE · 3+ years total

Lead Graphic Designer — Globalnet / GNM

Marketing Department · 2023 — present

- Brand materials were assembled from work by different contractors and didn't connect well with each other — built a unified typographic and compositional system with a template library, so new layouts got assembled faster and stayed on-brand.
- GlobalNet clients waited for an operator's reply even on routine questions in Telegram — built a bot with an AI assistant on top of the company's knowledge base: most requests are now resolved without a manager, only complex cases get escalated.
- Complaints and conflicts in client chats got lost in the flow of messages — built a monitoring bot that flags such signals via a neural network and alerts a manager immediately, instead of relying on manual chat checks.
- Event-stand banners were rebuilt from scratch every time — brought the company's brand identity through several iterations to a fixed system now used across the team.

Designer — Cheeseberry

2023 · 1 month

- Needed to deliver packaging, presentations, and an ad banner within a single month — produced the full set of materials on deadline without bringing in another designer.

Design Intern — TenChat

2023 · 3 months

- The internship ran at the same production pace as the in-house team — joined website updates and produced 3D animations for ad clips that shipped without revisions.

Designer, Marketing Department — METRO Cash & Carry

2022 · 3 months

- Social and Telegram-channel posts had to go out exactly on promotion dates — prepared ad creatives and event merch with no schedule slips.

Print & Apparel Designer — Artflash

2022 · 4 months

- The brand needed fresh prints for collaborations with independent artists — proposed collaboration concepts and offers, part of the sketches went into production.

Freelance Illustrator

2018 — 2022

- Clients from various platforms commissioned custom characters and stickers — consistently delivered full-cycle work from sketch to final artwork; some pieces later became the basis for a third-party project — a website that determines personality type for kids.
